Case Study
SAP Lumira Designer on SAP Business Objects Universe

Location
United States

Revenue
50+ Billion USD

Results

- Achieved initial load time of 5 seconds with SAP BusinessObjects Universe as the semantic layer
- Delivered 8 dashboards that were hyperlinked using complex rules with the ability to pass business parameters
- Implemented a complex & dynamic rendering of KPI tiles based on business rules
- Solution templatized for subsequent regional and business unit implementations.

- Delivered 8 dashboards to track sales performance and benchmark against competitors' performance
- Enabled seamless user experience by designing a single launch page that interlinked with & enabled navigation to other dashboards by leveraging complex rules
- Managed additional complexity to deliver one responsive application for both desktop & iPad
- Leveraged VBX extensions to leverage unique features & faster go-to-market
